# Contents

Neurological Issues in General Medicine and Surgery.....	3
Surgical Principles and Techniques .....	4
Core Radiology .....	5
Headache and Facial Pain .....	5
Ischaemic Vascular Disease.....	6
Haemorrhagic Vascular Disease.....	6
Head Injury .....	7
Transient Loss of Consciousness and Epilepsy.....	8
Neurological Infections .....	9
Neuro-inflammatory Diseases .....	9
Neurodegeneration.....	10
Movement Disorders .....	10
Neuromuscular Diseases.....	11
Coma and Sleep .....	11
Neuro-ophthalmology.....	12
Neuro-otology.....	12
Diseases of the Autonomic Nervous System .....	13
Elective Spinal Disease .....	13
Spinal Tumours .....	13
Spinal Trauma .....	14
Tumours and Cysts.....	14
Hydrocephalus and Cerebrospinal Fluid Pathologies .....	16
Neuro-rehabilitation and Spinal Injury Rehabilitation.....	16
Neuropsychiatry.....	17
Neuropsychology .....	17
Neuropaediatrics.....	17

## Clinical Assessment

Title:
An Approach to the Cognitively-impaired Adult
An Introduction to Neurological Assessment
Common Neurological Symptoms: Behavioural and Organic Mental Symptoms
Common Neurological Symptoms: Language Problems
Common Neurological Symptoms: Twitching or Muscle Fasciculations
Examination of the Limbs
Examining Patients in Coma
History and Examination of the Spine
Lumbar Puncture and Analysis of Cerebrospinal Fluid
Neurological Assessment: Movement Disorders
Neurological Assessment: Weakness and Sensory Loss
Neurological Examination: Cranial Nerves
Neurological Examination: Gait
Neurological Examination: Speech
Neurological Examination: Visual Function
Neurological History: General Approach and Common Pitfalls
Neuromuscular Assessment
Principles of Neurological Investigation
Quantitative Assessment of Pain
The Mental Status Examination in Neurology

## Neurological Issues in General Medicine and Surgery

Title:
Common Neurological Symptoms: Delirium
Common Neurological Symptoms: Headache
Common Neurological Symptoms: Movement Disorders
Common Post-Traumatic Neurological & Neuropsychological Symptoms & Interventions
Common Neurological Symptoms: Seizures
Common Neurological Symptoms: Swallowing Disorders
Neurological Complications of Alcohol Misuse
Neurological Complications of Cardiac Disease
Neurological Complications of Critical Illness
Neurological Complications of Endocrine Disease
Neurological Complications of Gastrointestinal Disease
Neurological Complications of Haematological Disease
Neurological Complications of Liver Disease
Neurological Complications of Renal Disease
Neurological Complications of Vitamin and Other Deficiency Diseases

## Surgical Principles and Techniques

### Sessions:

Advanced Microsurgical Skills

Application of a Halo or Traction to the Cervical Spine

Closing a Neonatal Myelomeningocele

Diagnosis and Management of Post-operative Haematoma

Fusing C1 to C2

How to do an Image-guided Biopsy

How to do an Image-guided Craniotomy

How to do an Interhemispheric Approach for a Colloid Cyst

Image-guided Neurosurgery

Inserting or Revising a Syringopleural Shunt

Inserting Pedicle Screws

Intraoperative Imaging Techniques

Intraoperative Neurosurgical Electrophysiological Monitoring

Minimal Invasive Neurosurgery

Minimally Invasive Surgical Approaches to the Posterior Thoraco-lumbar Spine

Performing a Convexity Craniotomy

Performing a Craniotomy Convexity Meningioma

Performing a Far Lateral Craniotomy

Performing a Lumbar Laminectomy

Performing a Lumbar Microdiscectomy

Performing a Midline Posterior Fossa Craniotomy

Performing a Midline Supratentorial Craniotomy

Performing a Posterior Cervical Fusion Part 1 & 2

Performing a Pterional Craniotomy

Performing a Retrosigmoid Craniotomy

Performing a Subfrontal Craniotomy

Performing a Trans-sphenoidal Approach to the Sellar Part 1 & 2

Performing an Anterior Cervical Discectomy

Performing an Eye Brow Craniotomy Part 1 & 2

Performing Burr Holes

Performing Posterior Cervical Decompression Procedures

Posterior thoracic approaches

Preparing the Operative Site

Principles of Awake Craniotomy

Principles of Surgical Scoliosis Correction

Prions and Neurosurgery

Surgery in Children

Surgical Approaches to Tumours of the Ventricle

The Modern Theatre Environment

The Operating Microscope

The Translabyrinthine Approach to the Cerebellopontine Angle

Use of an Endoscope

Use of Standard Neurosurgical Equipment

Vertebroplasty and Kyphoplasty

## Core Radiology

Sessions:

CT Based Imaging Techniques

Digital Subtraction Angiography (DSA)

MR Based Imaging Techniques

Normal Cranial Neuroradiological Anatomy

Normal Spinal Radiological Neuroanatomy

Normal Vascular Radiological Neuroanatomy

Nuclear Medicine Based Imaging Techniques

Spinal Myelography

Ultrasound and Doppler Imaging

X-ray Development, Physics, Uses, Risks and Regulation

## Headache and Facial Pain

Sessions:

Acute Management Prevention of Migraine

Cluster Headache Acute and Prophylactic Treatments

Complex Regional Pain Syndrome

Diagnosis and Management of Trigeminal Autonomic Cephalalgias

Diagnosis and Treatment of Cranial Arteritis

Diagnosis and Treatment of Episodic Tension Type Headache

Diagnosis and Treatment of Migraine

Diagnosis and Treatment of Non-dental Facial Pain

Diagnosis and Treatment of Trigeminal Neuralgia

Differential Diagnosis of Headache

Head Pain: Epidemiology and General Considerations

Headache in Children and Adolescents

Idiopathic Intracranial Hypertension

Low CSF Pressure Headache

Neuropathic Pain

Overview of Chronic Headache

Pain Related Anatomical Pathways and Physiology

Performing a Microvascular Decompression for Trigeminal Neuralgia

Performing a Percutaneous Trigeminal Rhizotomy

Psychological Management in Chronic Headache

## Ischaemic Vascular Disease

Sessions:
A Structured Approach to the Investigation and Evaluation of the Cause of Stroke
Acute Stroke Treatment Part 1
Acute Stroke Treatment Part 2
Basic Principles of CT Interpretation for Acute Stroke
Cardioembolic Stroke
Impact of Stroke and Transient Ischaemic Attack on Individuals
Ischaemic Stroke: Carotid and Vertebral Artery Dissection
Neuroradiological Interventions in Carotid or Vertebral Artery Stenosis
Overview of the NIHR Stroke Research Network
Paediatric Stroke
Performing a Carotid Endarterectomy
Providing Advice to a Person With Stroke and Their Carer
Stroke Aetiology
Stroke Clinical Features and Classification
Stroke Mimics
Stroke: Palliative Care
Surgical Management of Carotid Stenosis
The Impact of Stroke Upon Populations
The Pathology of CNS Ischaemia and Infarction
The Secondary Prevention of Stroke
TIA Clinical Features and Referral Pathways and Investigations
Vasculitis
Venous Stroke

## Haemorrhagic Vascular Disease

Sessions:
Aetiology and Pathophysiology of Spontaneous Intracerebral Haemorrhage
Aetiology and Pathophysiology of Subarachnoid Haemorrhage
Assessment and Emergency Management of Subarachnoid Haemorrhage
Cerebral Revascularisation
Cranial Dural Arteriovenous Fistulae
Definitive Management of an Aneurysm: Radiology
Definitive Management of an Aneurysm: Surgery
Embolisation for Arteriovenous Malformations
Familial Intracranial Aneurysms
Infantile Intraventricular Haemorrhage
Management of Spontaneous Intracerebral Haemorrhage
Management of Vein of Galen Malformations
Medical Management of Subarachnoid Haemorrhage
Paediatric Vascular Neurosurgery

Principles in Managing Cavernomas
Radiological Investigation of Subarachnoid Haemorrhage Part 1
Radiological Investigation of Subarachnoid Haemorrhage Part 2
Spinal Vascular Malformations
Stereotactic Radiosurgery for Arteriovenous Malformations
Surgery for Arteriovenous Malformations
The Diagnosis and Management of Spontaneous Subarachnoid Haemorrhage
Unruptured Intracranial Aneurysms
Vasospasm

## Head Injury

<b>Sessions:</b>
Cerebral Protection Strategies in Head Injury
Complications of Head Injury: Cranial Nerve and Vascular Complications
Complications of Head Injury: CSF Leak and Intracranial infection
Complications of Head Injury: Hydrocephalus, Seizures and Pituitary Dysfunction
Early Phase Care of the Moderate and Severely Head Injured Patient
Epidemiology of Head Injury
Evacuation of a Chronic Subdural Haematoma
Head Injuries in Children
Imaging in Head Injury
Inflicted Head Injury in Childhood: Non-accidental
Insertion of an Intracranial Pressure Monitor
Introduction to the early Surgical Management of Head Injury
Management of Depressed Skull Fractures
Management of the Head Injured Patient
Neuropathology of Head Injury
Neuropsychology and Brain Injury
Nutrition and Fluid Balance in the Head Injured Patient
Outcome After Head Injury Part 1
Outcome After Head Injury Part 2
Performing a Cranioplasty
Performing a Decompressive Craniectomy for Traumatic Brain Injury
Performing a Trauma Craniotomy
Safe Transfer of Ventilated Head Injured Patients

## Transient Loss of Consciousness and Epilepsy

### Sessions:

Acute Symptomatic Seizures

Assessment and Treatment of Refractory Epilepsy

Assessment of Patients Presenting with Blackouts

Brain Imaging in Seizures and Epilepsy

Cardiac Syncope

Causes of Epilepsy: Symptomatic

Childhood Absence Epilepsy

Choosing Antiepileptic Drugs For Focal Epilepsy

Choosing Antiepileptic Drugs For Generalised Epilepsy

Convulsive Status Epilepticus

Diagnosis of Frontal Lobe Epilepsy

Diagnosis of Temporal Lobe Epilepsy

Differential Diagnosis of Blackouts and Epilepsy

Epilepsy and Intellectual Disability

Epilepsy in Adolescence

Epileptic Seizures and Syndromes in Neonates and Infants

Idiopathic (genetic) Epilepsy

Interactions of Antiepileptic Drugs

Management of Epilepsy in Remission

Management of Epilepsy in the Elderly

Management of Women with Epilepsy: Reproductive Issues

Memory and Epilepsy

Monitoring Drug Therapy

Non-convulsive Status Epilepticus

Occipital and Parietal Lobe Epilepsies

Other Childhood Epilepsy Syndromes

Palliative Surgical Treatments for Epilepsy

Pregnancy and Epilepsy

Role of EEG in Assessment for Epilepsy Surgery

Role of EEG in the Diagnosis of Epilepsy

Social Consequences of Epilepsy

Starting Epilepsy Treatment

Surgical Treatment of Epilepsy Workup and Outcome

Temporal Lobe Surgery for Epilepsy

The Causes of Epilepsy: Idiopathic Epilepsy (genetic Epilepsy)

The Classification of Seizures and the Epilepsies

The Diagnosis of Dissociative (Psychogenic Non-epileptic) Seizures

Diagnosis of the Reflex (Vasovagal) Syncope

The Management of Dissociative (Non Epileptic) Seizures

Use of Antiepileptic Drugs in Refractory Epilepsy

## Neurological Infections

Sessions:
Acute Pneumococcal and Meningococcal Meningitis
Aseptic Meningitis
Autoimmune Encephalitis
Botulism
Cerebral Malaria
Congenital Cytomegalovirus
Cryptococcal Meningitis
Diagnosing and Managing Patients with Tubercular Meningitis
Discitis Vertebral Osteomyelitis and Epidural Abscess
Encephalitis
Herpes Simplex Virus Encephalitis
HIV Encephalopathy
HIV Neuropathy
Human Prion Diseases
Imaging Features of Bacterial Brain Infection
Introduction to Neurological Infectious Diseases
Listeria Monocytogenes Meningitis
Lyme Borreliosis
Nervous System Manifestations of Varicella Zoster Infection
Syphilis
Tetanus
The Neurology of HTLV-1 Infection
Toxoplasmosis

## Neuro-inflammatory Diseases

Sessions:
Acute Disseminated Encephalomyelitis in Children
Acute Disseminated Encephalomyelitis
Autoimmune Encephalopathies
Disease Modifying Treatments in Multiple Sclerosis: Interferons and Glatiramer Acetate
Multiple Sclerosis: Assessment and Diagnosis
Multiple Sclerosis: Basic Epidemiology and Pathophysiology
Multiple Sclerosis: Management of Relapses
Multiple Sclerosis: Other Disease Modifying Treatments
Neuro-Behçet's
Neurological Manifestations of Lupus and the Antiphospholipid Syndrome
Neuromyelitis Optica Spectrum Disorders (NMOSD)
Neuropsychiatric Aspects of Multiple Sclerosis and White Matter Disorders
Neurosarcoidosis
Rheumatoid Sjögren's and Other Autoimmune Disorders Affecting the CNS

Symptomatic Therapies in Multiple Sclerosis

Transverse Myelitis: Causes Assessment and Management

## Neurodegeneration

Sessions:

Alzheimer's Disease: Current and Future Treatments

Alzheimer's Disease: Genetics and Current Hypotheses

Caring For Patients With Dementia

Clinical Aspects of Alzheimer's Disease

Degenerative Dementias: Current Concepts and Overview

Dementia with Lewy Bodies: Basic Science and Pathology

Dementia with Lewy Bodies: Clinical Aspects

Frontotemporal Lobar Degeneration: Basic Science

Frontotemporal Lobar Degeneration: Clinical Syndromes

Huntington's Disease

Investigation of Dementia

Prion Disease: Epidemiology and Clinical Aspects

Prion Disease: Pathogenesis and Genetics

Vascular Cognitive Impairment: Current Concepts

Vascular Cognitive Impairment: Rare and Unusual Causes

Young Onset and 'Treatable' Dementias

## Movement Disorders

Sessions:

Acquired Cerebellar and Spinocerebellar Ataxias

Classification and Epidemiology of Movement Disorders

Clinical Aspects of Progressive Supranuclear Palsy

Corticobasal Degeneration and the Corticobasal Syndrome

Diagnosis and Treatment of Essential Tremor

Drug-induced Movement Disorders

Dystonia: Classification and Genetics

Dystonias: Secondary Causes and Investigations

Features and Treatment of Parkinson's Disease Tremor

Features Causes and Treatment of Cerebellar Tremor Ataxia

Hereditary Cerebellar Ataxia

Hereditary Spastic Paraplegia

Multiple System Atrophy

Myoclonus

Parkinson's Disease Management of Motor Symptoms

Parkinson's Disease: Cognitive and Psychiatric Features

Parkinson's Disease: Definition Pathogenesis and Pathology

Parkinson's Disease: Surgical Treatment

Rare Causes of Tremor
Restless Legs Syndrome
Stiff Person Spectrum Disorders
The Genetics of Parkinsonism
The Primary Focal Dystonias
Tic Disorders and Tourette Syndrome
Tremor Classification and Management

## Neuromuscular Diseases

Sessions:
Acquired Muscle Disease
Acquired Peripheral Neuropathies
Autoimmune Myasthenia Gravis
Brachial and lumbosacral plexus
Clinical Introduction to Neuromuscular Diseases
Clinical Neurophysiology of Neuromuscular Junction Disorders
Clinical Neurophysiology of Skeletal Muscle Diseases including ion channelopathies
Genetic Muscle Disease
Hereditary Neuropathies
Limb Girdle Muscular Dystrophy
Multifocal Motor Neuropathy
Myotonic Dystrophy
Neuromuscular Junction Disorders
The Diagnostic Pathology of Neuromuscular Disease Part 1
The Diagnostic Pathology of Neuromuscular Disease Part 2

## Coma and Sleep

Sessions:
The Assessment of Patients in Coma
Causes and Clinical Assessment of Coma
General Medical Care on Neurological Intensive Care Unit
EEG in Sleep Disorders and the MSLT
EEG in the Diagnosis of Coma
Excessive Daytime Sleepiness
Hypoxic-ischaemic Brain Injury
Narcolepsy
Normal Sleep Architecture
Raised ICP Herniation and Management

## Neuro-ophthalmology

Sessions:
Assessment of Double Vision
Assessment of Ptosis
Assessment of Visual Failure
Central Disorders of Saccadic and Pursuit Eye Movements
Chiasmal Disorders
Heredo-familial Optic Neuropathies
Ischaemic Optic Neuropathies
Nystagmus
Ocular Myopathies
Ocular Motor Disorders
Optic Nerve Tumours
Optic Neuritis
Orbital and Cavernous Sinus Disorders
Papilloedema and Related Optic Disc Disorders
Pupil Abnormalities
Retinal Disorders in Neurological Disease
Retrochiasmal Disorders
Toxic Nutritional Optic Neuropathy

## Neuro-otology

Sessions:
Acute Vertigo and Dizziness
Anatomy and Pathophysiology of Dizziness and Vertigo
Benign Paroxysmal Positional Vertigo
Central Causes of Vestibular Disturbance
Central Disorders of Hearing
Chronic Dizziness - Clinical Presentation and Management
Diagnostic Approach of Dizziness and Vertigo
Falls in the Elderly: Assessment and Management
Hearing and Balance Tests
Hearing Disorders and Tinnitus
Meniere's Disease and Migraine Associated Dizziness
Peripheral Causes Vestibular Disorders Sensory Mismatch Syndromes
Principles of Vestibular Rehabilitation

## Diseases of the Autonomic Nervous System

Sessions:
Autonomic Failure Primary and Secondary
Functional Anatomy of the Autonomic Nervous System
Investigation and Management of Neurogenic Bladder Dysfunction
Investigation and Management of Neurogenic Sexual Dysfunction Part 1
Investigation and Management of Neurogenic Sexual Dysfunction Part 2
Neural Control of the Bladder
Neurogenic Bowel Dysfunction
Neurological Control of Sexual Function
Parkinson's Disease and Parkinsonism Causes of Bladder, Bowel and Sexual Dysfunction
Pelvic Organ Dysfunction Following Cauda Equina Damage
Peripheral Nerve Disorders Bladder, Bowel and Sexual Dysfunction

## Elective Spinal Disease

Sessions:
Atlanto-axial Subluxation
Coccydynia
Congenital Scoliosis
Degenerative Scoliosis
Diagnosis and Treatment of Back Pain
Early Onset Scoliosis
Inflammatory Spondyloarthropathy
Management of Lumbar Disc Prolapse and Cauda Equina Syndrome
Managing Cervical Degenerative Disease
Neuromuscular Scoliosis
Osteoporosis
Rheumatoid Arthritis in the Spine
Sacroiliac Joint (SIJ) Pain
Spinal Dysraphism
Surgical Treatment of Chronic Low Back Pain
Thoracic disc prolapse
Torticollis

## Spinal Tumours

Sessions:
Imaging Features of Intramedullary Spinal Cord Tumours
Intramedullary Spinal Cord Tumours
Malignant Spinal Cord Compression
Primary Bone Tumours of the Spine
Principles in Managing Intradural Extramedullary Spinal Tumours

Radiology of Spinal Intradural Extramedullary Tumours

Surgical Treatment of Spinal Intradural Extramedullary Tumours

## Spinal Trauma

Sessions:

Anatomy of the spinal column and spinal stability

Atlanto-axial Cervical Spine Fractures

Classification of Fractures of the Thoracolumbar Spine

Initial Management of Spinal Injury and Spinal Shock

Pre-operative Assessment and Anaesthetic Management of Patients with Spinal Cord Injury

Principles of Surgical Treatment of Spinal Injuries

Sacral fractures

Spinal Injuries in Children

Subaxial Cervical Spine Fractures

Thoracolumbar Trauma

## Tumours and Cysts

Sessions:

Aetiology and Pathogenesis of Embryonal Tumours of the CNS

Aetiology and Pathophysiology of CNS Lymphomas

Aetiology and Pathophysiology of Intracranial Meningiomas

Aetiology and Pathophysiology of Pituitary Adenomas

Anaesthetic Management of Supratentorial Tumours

Assessment of the Patient with a Brain Tumour

Characteristic Appearances and Differential Diagnosis of Meningiomas

Clinical Presentation of Patients with Brain Tumours

Diagnostic Imaging in Brain Tumours

Emerging Treatments for Gliomas

Histological and Molecular Diagnostics of Brain Tumours

Histology and molecular pathology of IDH wildtype adult gliomas

Histology and Molecular Pathology of LGG including Pilocytic Astrocytoma and Glioneuronal Tumours

Histopathology of CNS Lymphomas

Histopathology of Embryonal Tumours of the CNS

Histopathology of Meningiomas

The Histopathology of Peripheral Nerve Sheath Tumours and Schwannomas

Histopathology of Pineal Region Tumours

Imaging Features of Central Nervous System Lymphomas

Imaging Features of Medulloblastoma and Other PNETs

Imaging Features of Pineal Region Tumours

Intracranial Metastases Imaging and Differential Diagnoses

Intraoperative Chemotherapy and Radiotherapy

Intraoperative Surgical Adjuncts Part 1
Intraoperative Surgical Adjuncts Part 2
Long-term Complications of Radiotherapy and Chemotherapy for CNS Disease
Malignant Meningitis
Management of Cerebellopontine Angle Tumours
Management of Craniopharyngiomas
Management of Medulloblastoma
Management of Meningiomas
Management of Pituitary Adenomas for Surgeons
Management of Primary CNS Lymphomas
Management Principles for Metastases
Medical Management of Pituitary Adenomas
Molecular Biology of Brain Tumours
Molecular Pathology and Histology of Ependymal Tumours
Molecular Pathology and Histology of IDH Mutant Gliomas
Non-surgical Management of Low Grade Gliomas
Palliative Care and End of Life in Brain Tumour Patients
Paraneoplastic Neurological Disorders of the CNS and PNS
Pathology and Management of Dermoids and Epidermoids
Pathology of Pilocytic Astrocytomas
Pathophysiology and Management of Arachnoid Cysts
Pathophysiology and Management of Colloid Cysts
Peripheral Nerve Sheath Tumours
Pituitary Apoplexy
Principles of Brain Tumour Management in Children
Principles of Chemotherapy
Principles of Radiotherapy and Radiosurgery
Radiology of CNS Cysts
Radiology of Dermoids and Epidermoids
Referral and Management Guidelines for Patients with Brain Tumours
Skull Lesions
Special Considerations for Skull Base Tumours
Stereotactic Radiosurgery for Skull Base Tumours
Surgical Management of High Grade Gliomas
Surgical Management of Low Grade Gliomas
The Histopathology of Choroid Plexus Neoplasms
Treatment of High Grade Gliomas
Tumours of the Brainstem
Tumours of the Central Nervous System: Craniopharyngioma

## Hydrocephalus and Cerebrospinal Fluid Pathologies

### Sessions:

Aetiology and Pathophysiology of Hydrocephalus  
Chiari Malformation  
Cranial Cerebrospinal Fluid Fistula  
Disorders of the Foramen Magnum  
Inserting a Ventricular Access Device or External Ventricular Drain  
Investigation and Treatment of Spinal Cerebrospinal Fluid Leaks  
Management of Syringomyelia  
An Introduction to the Management of Hydrocephalus in Children  
Normal Pressure Hydrocephalus  
Performing a Subtemporal Decompression  
Performing an Endoscopic Third Ventriculostomy  
Spinal Arachnoiditis

## Neuro-rehabilitation and Spinal Injury Rehabilitation

### Sessions:

Aetiology and Management of Pressure Sores  
Assessment and Management of Swallowing Disorders  
Autonomic Dysfunction  
Bladder Problems in Multiple Sclerosis  
Bowel Problems in Multiple Sclerosis  
Clinical Gait Analysis in Rehabilitation Medicine  
Diagnosis and Management of Cognitive Functioning After Stroke  
Early Supported Discharge for Stroke  
Family Relationships and Supporting Carers  
Fatigue in Multiple Sclerosis  
History Taking and Examination in Complex Neurological Disability  
Locked-in Syndrome  
Low Awareness States  
Management of Spasticity and Associated Features  
Management of Spasticity in Children  
Management of Spasticity in Post Stroke Syndrome  
Managing Late Deterioration in Neurological Disability  
Multiple Sclerosis: Maintaining Activities of Daily Living  
Orthotics and the Avoidance and Management of Contractures  
Pain After Stroke  
Pain in Multiple Sclerosis  
Physical Therapies After Stroke  
Rehabilitation After Stroke  
Rehabilitation in Nursing Homes  
Role of Occupational Therapy in Neurorehabilitation

Speech and Language Problems and Their Management  
The Management of Posture and Mobility in Multiple Sclerosis  
Vocational Rehabilitation Following Neurological Trauma or Illness

## Neuropsychiatry

Sessions:

ASD and Asperger's Syndrome  
Bulimia Nervosa Lessons from a Patient's Perspective  
Epilepsy and Psychosis  
Forensic Neuropsychiatry  
Functional Neurological Symptoms: Assessment  
Functional Neurological Symptoms: Treatment  
Medical Complications and Re-feeding for Anorexia Nervosa  
Memory Disorders  
Neuropsychiatric Syndromes in Dementia  
Neuropsychiatry of Depression in Epilepsy  
Neuropsychiatry of Epilepsy  
Performing a Neuropsychiatric Examination  
Principles of Developmental Neuropsychiatry in Children and Young People  
Dissociative (Non-epileptic) Seizures  
Psychopharmacology of Anxiety Disorders  
The Diagnosis and Treatment of ADHD in Adults  
The Forensic Neuropsychiatry of Neurodegenerative Disorders

## Neuropsychology

Sessions:

Cognitive Assessment in Epilepsy  
Cognitive Assessment in Stroke  
Cognitive Rehabilitation  
Disorders of Executive Function  
Dyslexia (under development)  
Occipital Lobe Cognitive Deficits  
Parietal Lobe Cognitive Deficits  
Social Cognition Disorders  
Speech and Language Disorders

## Neuropaediatrics

Sessions:

Acute disseminated encephalomyelitis in children – an inflammatory CNS syndrome  
Childhood Absence Epilepsy  
Duchenne Muscular Dystrophy
